EXPERIENCE

Tech Lead — Automate Army

May 2025 — Present

State College, PA · Remote

Leading the technical team while staying hands-on: architecture decisions, code reviews and team management, plus building the product itself — AI-powered applications shipped to production. MCP integrations and LLM features with human-in-the-loop guardrails.

Team Management · Architecture · MCP · LLM Integration · React · TypeScript

Software Engineer — The SilverLogic

May 2022 — Apr 2025

Boca Raton, FL · Remote

Full-stack development and maintenance of client applications: React and TypeScript on the front, Django APIs on the back, Docker for containerized deploys. Active in code reviews, sprint planning and architecture decisions for scalable, high-performance products.

React · TypeScript · Django · Docker · PostgreSQL · AWS

Front-end Developer — Seox · Agência Digital

Feb 2021 — Apr 2022

Volta Redonda, RJ, Brazil

Started with WordPress theme development — Sass and vanilla JavaScript. Rode the agency's modernization into the headless model: specialized in React, building sites, e-commerce, blogs and portals on Next.js for performance and SEO.

WordPress · Sass · JavaScript · React · Next.js · Headless

SELECTED PROJECTS

Liftstrict — gym progress tracker

2025

React 19 + Django REST. Workouts, sessions, sets and automatic personal records (estimated 1RM), plus body-weight tracking with goals. github.com/rodrigonahid/liftstrict-web

Nutrify — nutrition platform

2026

Next.js 16 + Drizzle + PostgreSQL. Multi-role platform connecting nutritionists and patients: meal plans, progress tracking and a full training module. github.com/rodrigonahid/nutrify

STACK

— TypeScript, React, Next.js, NestJS, Node.js
— Python, Django, Django REST Framework
— PostgreSQL, Drizzle ORM, Docker, AWS, GCP
— MCP servers & integrations
— LLM integration, RAG pipelines
— Vector databases, AI agents
— Claude & Cursor workflows

EDUCATION

Computer Science — fundamentals

2020 — 2021
